

Test End to End BEHAT

```
Given I am on "/" # FeatureContext::visit()
```

Scenario: Create a Task

```
When I follow "Se connecter" # features/tasks/taskmgmt.feature:9
And I fill in "Nom d'utilisateur" with "Smaeluser" # FeatureContext::clickLink()
And I fill in "Mot de passe" with "1234" # FeatureContext::fillField()
And I press "Se connecter" # FeatureContext::fillField()
Then I should see "Se déconnecter" # FeatureContext::pressButton()
When I follow "Créer une nouvelle tâche" # FeatureContext::assertPageContainsText()
Then I am on "/tasks/create" # FeatureContext::clickLink()
And I fill in "task_title" with "Test Behat task form" # FeatureContext::visit()
And I fill in "task_content" with "This is the test content" # FeatureContext::fillField()
And I press "Ajouter" # FeatureContext::fillField()
Then I should see "La tâche a été bien été ajoutée." # FeatureContext::pressButton()
# FeatureContext::assertPageContainsText()
```

Scenario: Edit Task

```
When I follow "Se connecter" # features/tasks/taskmgmt.feature:22
And I fill in "Nom d'utilisateur" with "Smaeluser" # FeatureContext::clickLink()
And I fill in "Mot de passe" with "1234" # FeatureContext::fillField()
And I press "Se connecter" # FeatureContext::fillField()
Then I should see "Se déconnecter" # FeatureContext::pressButton()
And I am on "/tasks" # FeatureContext::assertPageContainsText()
Then I follow "TestSmael" # FeatureContext::visit()
And I fill in "task_title" with "Test edit" # FeatureContext::clickLink()
And I fill in "task_content" with "Test edit content" # FeatureContext::fillField()
And I press "Modifier" # FeatureContext::fillField()
Then I should see "La tâche a bien été modifiée." # FeatureContext::pressButton()
# FeatureContext::assertPageContainsText()
```

Scenario: list of all tasks

```
When I follow "Consulter la liste des tâches à faire" # features/tasks/taskmgmt.feature:35
Then I am on "/tasks" # FeatureContext::clickLink()
And I should see "Marquer comme faite" # FeatureContext::visit()
# FeatureContext::assertPageContainsText()
```

Scenario: Delete task created by its user

```
When I follow "Se connecter" # features/tasks/taskmgmt.feature:40
And I fill in "Nom d'utilisateur" with "Smaeluser" # FeatureContext::clickLink()
And I fill in "Mot de passe" with "1234" # FeatureContext::fillField()
And I press "Se connecter" # FeatureContext::fillField()
Then I should see "Se déconnecter" # FeatureContext::pressButton()
When I follow "list_tasks" # FeatureContext::assertPageContainsText()
Then I am on "/tasks" # FeatureContext::clickLink()
And I should see "TestSmael" # FeatureContext::visit()
And I press "Supprimer" # FeatureContext::assertPageContainsText()
Then I should see "Superbe" # FeatureContext::pressButton()
# FeatureContext::assertPageContainsText()
```

```

Scenario: Delete task created by another user # features/tasks/taskmgmt.feature:52
  When I follow "Se connecter"                # FeatureContext::clickLink()
  And I fill in "Nom d'utilisateur" with "Yo"  # FeatureContext::fillField()
  And I fill in "Mot de passe" with "1234"     # FeatureContext::fillField()
  And I press "Se connecter"                   # FeatureContext::pressButton()
  Then I should see "Se déconnecter"           # FeatureContext::assertPageContainsText()
  When I am on "/tasks"                       # FeatureContext::visit()
  And I press "Supprimer"                      # FeatureContext::pressButton()
